#### 2.1.2 Drought - Irrigated situation

As the source of irrigation is basically STW and there is no any re<sup>p</sup>ort on ground water de<sup>p</sup>letion in the district; hence the <sup>q</sup>uestion of draught-irrigated situation does not arise.

Some other situation like pre monsoon flood and hailstorm often ex<sup>p</sup>erienced for which contingency <sup>p</sup>lans are necessary and mentioned under 2.2.3

Condition				Suggested Contingency measures

### 2.5.3 Fisheries/ A<sup>q</sup>uaculture

		Suggested contingency measures	
	Before the event <sup>a</sup>	During the event	After the event
1) Drought			
A. Capture			
Marine	-	-	-
Inland			
(i) Shalow water depth due to insufficient rains/inflow	Water suppl <sup>y</sup> from any other sources.	Water suppl <sup>y</sup> from other sources and reduce the stock.	Partial harvestin <sup>g</sup> and lime application.
(i) Chan <sup>g</sup> es in water quality	Thinnin <sup>g</sup> out of stock a <sup>g</sup> ainst reduced dissolved ox <sup>yg</sup> en and space Removal of aquatic weeds	Undulation of water surface to increase the dissolve ox <sup>yg</sup> en.	Remove aquatic ve <sup>g</sup> etation
(i) Any other			
B. Aquaculture (i) Shalow water in ponds due to insufficient rains/inflow	<ul> <li>For pond construction select soils with sufficient clay for retention of water.</li> <li>Apply sufficient or<sup>g</sup>anic manure durin<sup>g</sup> preparation to minimize water loss throu<sup>g</sup>h seepa<sup>g</sup>e.</li> <li>Insurance</li> <li>Excavation of bore wels</li> <li>Reduce biomass and stockin<sup>g</sup> density throu<sup>g</sup>h partial harvestin<sup>g</sup>.</li> <li>S e l out the fishes attainin<sup>g</sup></li> </ul>	<ul> <li>Pump in water from other water source (nearby sprin<sup>g</sup>, stream, rivers etc) or <sup>g</sup>round water, if any.</li> <li>Reduce food for minimum metabolism.</li> <li>Restrict fertilizer for preventin<sup>g</sup> al<sup>g</sup>al bloom and minimum stress.</li> <li>Dig deep trench in convenient part of the pond to save brood fishes.</li> <li>Careful observation on daily</li> </ul>	<ul> <li>Extended seed production</li> <li>Restock the pond.</li> <li>Inte<sup>g</sup>rated fish farmin<sup>g</sup></li> <li>Short duration culture of species that are fast <sup>g</sup>rowin<sup>g</sup> in initial sta<sup>g</sup>e and can be marketed at s m al size (minor and medium carps).</li> <li>Air breathin<sup>g</sup> fish culture</li> <li>Claim compensation with support</li> </ul>

	markatable size to minimize loss	basis	of record and documents
	marketable size to minimize loss.	Dasis.	of fecold and documents.
	• Stock fishes that can thrive low water depth, like air breathin <sup>g</sup> fishes.	• Scare away birds and other animals (atracted by shalow water to catch fish) – may be	• Padd <sup>y</sup> cum fish culture
	•Maintenance of proper record for claimin <sup>g</sup> compensation, especial <sup>y</sup> in schemes assisted by Govt. or financial institutes.	vector for diseases.	
	•Plannin <sup>g</sup> for rain water harvest.		
(i) Impact of salt load build up in ponds / chan <sup>g</sup> e in water	• Thinnin <sup>g</sup> out of stock a <sup>g</sup> ainst reduced dissolved ox <sup>yg</sup> en and	• Recirculation of water and/or aeration.	
quanty	space	• Careful observation on daily basis.	-
(i) Any other	-	-	-
2) Floods			
A. Capture			
Marine	-	-	-
Inland	• Preparation for pen and ca <sup>g</sup> e culture	<ul> <li>Pen &amp; ca<sup>g</sup>e culture</li> <li>Can get en<sup>g</sup>a<sup>g</sup>ed in other related activities like net and <sup>g</sup>ear makin<sup>g</sup>.</li> </ul>	• Desiltin <sup>g</sup> & weed removal if possible
(i) No. of boats / nets/dama <sup>g</sup> ed			
(i) No.of houses damaged			
(i) Loss of stock			• Pen & ca <sup>g</sup> e culture
(iv) Chan <sup>g</sup> es in water quality			
(v) Health and diseases			
B. A <sup>q</sup> uaculture			

(i) Inundation with flood water	<ul> <li>Insurance</li> <li>Repairin<sup>g</sup>, turfin<sup>g</sup> and compaction of peripheral embankments.</li> <li>Horticulture on the embankment to prevent erosion.</li> <li>Sufficient bamboo poles and nylon nets to be kept ready.</li> <li>'Hi<sup>g</sup>h stockin<sup>g</sup> multiple harvestin<sup>g</sup>' can be taken up.</li> <li>S e l out the fishes attainin<sup>g</sup> marketable size to minimize loss.</li> <li>Maintenance of proper record for claimin<sup>g</sup> compensation, especialy in schemes assisted by Govt. or financial institutes.</li> </ul>	<ul> <li>Surround the pond with nets supported by bamboo poles to prevent escape of fish.</li> <li>Suppl<sup>y</sup> sufficient food to fishes to reduce tendenc<sup>y</sup> of escapin<sup>g</sup> from the pond.</li> <li>Harvestin<sup>g</sup> of fish quickly</li> </ul>	<ul> <li>Desiltin<sup>g</sup>.</li> <li>Restock the pond if ori<sup>g</sup>inal stock escapes.</li> <li>Inte<sup>g</sup>rated fish farmin<sup>g</sup></li> <li>Short duration culture of species that are fast <sup>g</sup>rowin<sup>g</sup> and can be marketed at s mal size.</li> <li>Claim compensation with support of record and documents.</li> <li>Removal of unwanted/ predator<sup>y</sup> fish from pond before stockin<sup>g</sup>.</li> <li>Padd<sup>y</sup> cum fish culture</li> </ul>
<ul> <li>(i) Water contamination and chan<sup>g</sup>es in water quality</li> <li>(i) Health and diseases</li> </ul>	<ul> <li>Prevent entry of water from outside.</li> <li>Precaution to prevent entry of pesticide/insecticide laden water from nearb<sup>y</sup> a<sup>g</sup>ricultural land.</li> <li>Apply lime re<sup>g</sup>ularly as per recommendation.</li> </ul>	• Apply lime re <sup>g</sup> ularly as per recommendation.	<ul> <li>Apply lime re<sup>g</sup>ularly as per recommendation.</li> <li>Remove muck and debris, if entered with flood.</li> <li>Apply preventive a<sup>g</sup>ents (e<sup>g</sup>. CIFAX) before on set of winter.</li> </ul>
(iv) Loss of stock and inputs (feed, chemicals etc)			• After possibe repairin <sup>g</sup> of the physical dama <sup>g</sup> e, take up late seed rearin <sup>g</sup> to be stocked in the next <sup>y</sup> ear.
(v) Infrastructure dama <sup>g</sup> e (pumps, aerators, huts etc)			
(vi) Any other			• S m a l scale homestead ornamental fish production, dependin <sup>g</sup> on the market.

3. Cyclone / Tsunami			
A. Capture	_	-	-
Marine	-	-	-
(i) Avera <sup>g</sup> e compensation paid due to loss of fishermen lives	-	-	-
(1) Av <sup>g</sup> . no. of boats / nets/dama <sup>g</sup> ed	-	-	-
(i) Av <sup>g</sup> . no. of houses dama <sup>g</sup> ed	-	-	-
Inland	-	-	-
B. Aquaculture	-	-	-
(i) Overflow / floodin <sup>g</sup> of ponds	-	-	-
(i) Chan <sup>g</sup> es in water qualit <sup>y</sup> (fresh water / brackish water ratio)	_	-	-
(i) Health and diseases	-	-	-
(iv) Loss of stock and inputs (feed, chemicals etc)	-	-	-
(v) Infrastructure dama <sup>g</sup> e (pumps, aerators, shelters/huts etc)	-	-	-
(vi) Any other	-	-	-
4. Heat wave and cold wave	-	-	-
A. Capture	-	-	-
Marine	-	-	-
Inland	-	-	-

B. Aquaculture	-	-	-
<ul> <li>(i) Chan<sup>g</sup>es in pond environment (water qualit<sup>y</sup>)</li> <li>(i) Health and Disease mana<sup>g</sup>ement</li> </ul>	<ul> <li>Apply lime re<sup>g</sup>ularly as per recommendation.</li> <li>Apply preventive a<sup>g</sup>ents (e<sup>g</sup>. CIFAX) before on set of winter.</li> </ul>	<ul> <li>Apply lime re<sup>g</sup>ularly as per recommendation.</li> <li>Restrict application of fertilizer as per requirement.</li> </ul>	• Apply lime re <sup>g</sup> ularly as per recommendation.
(i) Any other	_	-	-
